

Letter of motivation

As a witness and participate, I'm glad to see that Cumulus grows and expands rapidly in the past years. After CAFA joined the association as the 1st non- European art academy, I have recommended more than 30 European, U.S. and Asian schools joined the family since 2004.

I was privileged serving for Cumulus on the board in last term 2016-2019 and Icoграда (nowas ICO-D) since 2008, and get involved in developing educational networks and linking art and design universities globally. We are facing tremendous changes and challenges in creative industries and beyond, and there are a lot to be done through Cumulus members and its partners.

I intend to be more involved in:

- 1.Organizing design events, activities for education, such as coordinating workshops, projects, seminar and study programs for members schools and potential members.
- 2.Connecting international institutions with various industries and society, especially in China and Asian regions. This will benefit for all students to develop their future careers.
- 3.Promoting oriental and occidental cultural exchanges through design projects and exhibitions and publications.
- 4.Extending the Cumulus network in wider scale, especially in developing countries and Asia.
- 5 Promoting academic exchanges, mobilizing and coordinating for professionals to lecture and teach in member schools.

Xiao Yong

Professor of visual communication

Central Academy of Fine Arts CAFA Beijing, HUT, BGD
